MIRROR BLINDS

**\*\*\* TERRY WILSON WILL BE IN THE VALLEY FOR THE FIRST TIME.**

Terry Wilson specializes in handcrafting only the highest quality antler lighting, furniture and home accessories using only naturally shed whitetail, mule deer, fallow, elk and moose antlers. Terry, both artist and craftsman, has been creating true pieces of art out of antler for over 13 years. Over the years he has become one of the premier antler artisans known not only nationwide but internationally as a result of his perfectionism and distinctive designs which are appealing & tasteful with character all on their own. Antlers normally range from light to dark brown in color, but after they have been shed the elements of nature can bleach the antlers. Terry uses only the highest quality brown antlers on all products unless you request otherwise. Since antlers come in all shapes and sizes, each design is a unique piece and all dimensions are

approximate. Designs are balanced to perfection. All lights are straight up and all wiring is concealed internally. There are no exposed screws, no gaps in construction and very little putty is used. When holes are created, the surface is restored and blended to be virtually invisible. Antler parts are used whenever possible for details and lighting cups. All components are U.L. listed.

**\*\*\* Come by and Visit SOUTHERN DEER STANDS!!!!**

Keeping the tradition, Southern Deer Stands sets the mark with our line of hunting blinds and outdoors products. Constructed of 100% aluminum insulated panels which are light weight and feature double sliding windows, locking doors, heavy gauge steel towers and interiors that have cypress paneling, carpeting along with numerous other custom options. For safety, all of our tower blinds have landings with handrails and double handrails on the staircases. Southern Deer Stands are made in Texas to last a lifetime so you spend your time where it counts during deer season.
